Title: Our Mission

Content:

- To publish peer-reviewed scientific and technical research outputs generated from RRI's laboratory studies, field investigations, and numerical modeling activities.
- To disseminate knowledge in river engineering, hydraulics, sediment transport, morphology, estuarine and coastal processes, and water resources systems.
- To provide a credible platform for researchers, engineers, and professionals to share innovative solutions for water-related challenges in Bangladesh and beyond.
- To ensure quality, transparency, and scientific integrity through a structured editorial and peer-review process.
- To enhance accessibility and visibility of RRI research through digital publication and online journal management systems.
- To support evidence-based decision-making in national water resources planning and development through research dissemination.

Update Section **Cancel**

1.8 News Section: Publish journal-related news, updates, events, and important information for visitors and authors.

The screenshot shows the 'Admin' sidebar on the left with the 'News' menu item highlighted. The main content area is titled 'News' and contains a 'Manage News' section. This section includes a 'Create News' form with fields for 'News title', 'Short excerpt shown on card', and 'Full news content'. Below the form are fields for 'Attachment (optional)' and 'Sort Order' (set to 0), and an 'Active' checkbox. At the bottom of the form are 'Create' and 'Cancel' buttons. Below the form is an 'Existing News' section showing a single news item: 'New Study Reveals Rising Pollution Levels in Major Rivers' with a status of 'Active' and a sort order of 0. It includes 'Edit' and 'Delete' buttons.

1.8.1 Update News Section: Admin can edit and delete current News Sections.

This screenshot shows the 'Edit News' form. The top section, 'Existing News', displays the current news item: 'New Study Reveals Rising Pollution Levels in Major Rivers' with a status of 'Active' and a sort order of 0. Below this is the 'Manage News' section, which contains the 'Edit News' form. The form has three text areas for editing the news content. Below the text areas are fields for 'Attachment (optional)' and 'Sort Order' (set to 0), and an 'Active' checkbox. At the bottom are 'Update' and 'Cancel' buttons. A black arrow points from the text '(Admin can sort the news items from here by selecting the order)' to the 'Sort Order' input field.

1.9 Important Dates Section: Manage key journal dates including submission schedules, publication timelines, and deadlines.

1.9.1 Update Existing Important Date: Admin can edit and delete current important Dates.

1.10 Call for Papers Invitation: Create and publish official invitations for manuscript submissions and special journal issues.

1.13 Manage Roles: Control system roles, permissions, and access privileges for all user (Author, Editor, Reviewer) categories.

1.13.1 Update Roles: Admin can update existing roles.

1.14 Create New Users: Create new user accounts with assigned roles and access permissions.

The screenshot shows the 'Admin Superadmin Panel' with a sidebar menu. The 'Create User' option is highlighted. The main content area is titled 'Create User' and 'Create New User (Admin)'. It contains a form with the following fields:

- Title (e.g. Dr., Prof.)
- Full Name
- Email Address
- Mobile Number (e.g. +8801712345678)
- Address (optional)
- City (optional)
- Country (optional)
- Designation (e.g. Professor) (optional)
- Department (optional)
- ORCID ID (optional)
- Google Scholar Profile URL (optional)

At the bottom of the sidebar, there is a 'Logout' button.

*(New user will receive mail notification after successful registration)

1.15 Manage Users: View, update, activate, deactivate, and manage all registered system users.

1.16.1 Update Users: Update current user status.

1.16 Manage Editorial Board–Add New Editorial Board Member:

The screenshot shows the 'Add New Editorial Board Member' form. The left sidebar contains the 'Admin' menu with 'Manage Editorial Board' highlighted. The form fields include: Name, Title, Affiliation, Expertise, Country, Email, Role Type (set to Associate Editor), Display Order (set to 0), and Photo (with a 'Choose file' button). An 'Add' button is at the bottom. Below the form, the 'Current Members' section displays three members: S M Abu Horayra, Dr. Fatima Rukshana, and Dr. Moniruzzaman Khan Eusufzai, each with a profile picture and contact information.

1.16.1 Update Editorial Board Member:

The screenshot shows the 'Edit Member' form for Dr. Fatima Rukshana. The left sidebar contains the 'Admin' menu with 'Manage Editorial Board' highlighted. The form fields include: Name (Dr. Fatima Rukshana), Title (Principal Scientific Officer), Affiliation (Geotechnical Research Directorate, River Research Institute), Expertise, Country, Email, Role Type (set to Executive Editor), Display Order (set to 0), and Photo (with a 'Choose file' button). 'Update' and 'Cancel' buttons are at the bottom.

1.17 Reviewer Applications Management: Review, approve, and manage reviewer applications details.

The screenshot shows the 'Reviewer Applications' management page. The left sidebar contains the 'Admin' menu with 'Reviewer Applications' highlighted. The page displays a table of reviewer applications. An arrow points to the 'Actions' column, which contains a link icon. Below the table, a message states 'This section is under development.' and a note indicates that the admin can see details in a specific location.

1.18.1 View Submission:

The screenshot shows the 'View Submission' page in the Admin Superadmin Panel. It displays the submission details for 'Importance of Understanding of River and Groundwater Interaction: Perspective of'. The page includes an abstract, keywords, version timeline, authors, conflict of interest, and acknowledgements. A 'Manuscript File' section shows a preview of the manuscript file, which is not available for this file type. The page also includes a 'Full Submission Details' section with a table of authors and a table of versions.

Full Submission Details - Importance of Understanding of River and Groundwater Interaction: Perspective of

Abstract
Surface water-ground water interaction, is the most important part of hydrological cycle. But for a long time, the interaction of the two key portions of the water cycle: groundwater (GW) and surface water (SW), was regarded separate entities and was researched and quantified independently. As the world's concerns over water resources and the environment increase, the importance of considering surface water and groundwater as a single resource has become increasingly evident. Their deep interdependence has been revealed over time. Recent years have seen a paradigm shift in understanding the importance of interactions between groundwater and surface water bodies. The interaction of GW-SW occurs in a variety of ways across all terrain on Earth. Surface water commonly is hydraulically connected to ground water. Interactions between these two regimes are difficult to observe and measure and commonly have been ignored in water management considerations and policies. Many natural processes and human activities affect the interactions of surface water and groundwater.

Keywords
Surface water, ground water

A 'Close' button is located at the bottom right of the modal.

1.20 Peer Review Reports: (Admin can check multiple reviewers reports and feedback for any particular manuscript)

The screenshot shows the 'Admin' interface with a 'Peer Review Reports' section. The left sidebar includes links for 'Admin', 'Manage Roles', 'Create User', 'Manage Users', 'Manage Editorial Board', 'Reviewer Applications', 'Submissions', 'Review Assignments', 'Peer Review Reports' (active), 'Reviewer Performance', 'Analytics', 'Manage Issues & Volumes', 'Financials', and 'Decision Logs'. A 'Logout' button is at the bottom.

The main area is titled 'Peer Review Reports' and contains a 'Refresh' button. It displays a list of reports for various manuscripts:

- Importance of Understanding of River and Groundwater Interaction: Perspective of**
This is a text5 abstract. 2 Reviews. Positive Recommendations: 1.
- Test5**
This is a text5 abstract. 1 Reviews. Positive Recommendations: 1.
- Performance Analysis of Water Intake System in the Ganges River at Godagari Using Physical Model**
An intake structure in the Ganges River has been envisaged as a means for supplying surface water by pumping to Rajshahi city corporation area for municipal use through the treatment process. The performance of the intake structure was investigated in an undisturbed physical scale model. The Froude model was constructed on a geometric similar scale of 1:25. The study aimed to evaluate the hydraulic performance of a river intake system by assessing flow uniformity, critical... 2 Reviews. Positive Recommendations: 1.
- ASSESSMENT OF THE ACCURACY OF SATELLITE PRECIPITATION PRODUCTS WITH GROUND OBSERVED STATIONS IN THE NORTH-EAST REGION OF BANGLADESH**
Bangladesh is a low-lying riverine country located in South Asia with three sides east, west and north is surrounded by India and south by the Bay of Bengal. Bangladesh has one of the richest and largest floodplain systems in the world. The north-eastern part of Bangladesh is one of the most low-lying regions of the country. The upper area of this region is the Meghalaya State of India with mountain ranges and one of the world's most rain-prone areas, namely, Cherrapunji is situated here... 1 Reviews. Positive Recommendations: 0.
- HUMAN HEALTH RISK ASSESSMENT FROM THE CONTAMINANTS OF MAHANANDA RIVER WATER AND ITS ADJACENT GROUNDWATER IN BANGLADESH**
This study aims to assess the physicochemical parameters of the Mahananda River and the concentration of the nutrients of the Mahananda River water and the adjacent groundwater. Among physicochemical parameters, pH, Dissolved Oxygen (DO), and Total Dissolved Solids (TDS) were measured on 18 sampling sites of the river, while Sulfate (SO4²⁻), Orthophosphate (PO4³⁻), Arsenic (As), and Manganese (Mn) concentrations were measured on 17 oxidant sampling... 1 Reviews. Positive Recommendations: 1.
- Modeling Fish Habitat Suitability in the Karnafuli River, Bangladesh**
The Physical Habitat Simulation (PHABSIM) system is a numerical modeling tool that assesses the suitability of hydraulic habitats for different fish species. In this study, the PHABSIM system is used to evaluate the functioning area for three life stages of fish (fish (also fish)) at a specific discharge level. Multiple options for habitat simulation are utilized, allowing for a wide range of habitat and hydraulic conditions to be considered. By obtaining precise and comprehensive data regarding... 1 Reviews. Positive Recommendations: 0.

At the bottom, it indicates 'Showing 1-6 of 6 submissions' and pagination controls for 'Rows per page' (10), 'Previous', 'Page 1 of 1', and 'Next'.

1.21 Reviewer Performance: Analyze reviewer activities, review completion rates, response times, and evaluation performance.

1.22 Google Analytics: Generate comprehensive reports and visualize submission trends, publication statistics, readership data, and journal performance metrics.

1.23 Manage Volumes, Issues & Papers: Create, organize, and manage journal volumes, issues, and publication archives systematically.

1.23.1 Create New Volumes:

The screenshot shows a 'Create New Volume' form within the 'All Volumes' section. The form has two input fields: 'Volume Number *' and 'Year *'. The 'Year *' field is pre-filled with '2026'. There is also a 'Title (optional)' field. At the bottom of the form are two buttons: 'Create Volume' (in blue) and 'Cancel' (in grey). A green '+ New Volume' button is located in the top right corner of the 'All Volumes' section. An arrow points from this button down to the next screenshot.

The screenshot shows the 'Manage Volumes, Issues & Papers' page. On the left is a sidebar with the 'Admin' header and a list of menu items. The 'Manage Issues & Volumes' item is highlighted in blue. The main content area has three tabs: 'Manage Volumes', 'Manage Issues', and 'Manage Papers'. The 'Manage Volumes' tab is active. It displays the 'All Volumes' section, which includes the 'Create New Volume' form and a list of existing volumes. The list shows 'Volume 17' (Year: 2025) and 'Volume 16' (Year: 2024). Each volume entry has 'Edit' and 'Delete' links. An arrow points from the 'Delete' link of Volume 17 down to the next screenshot.

1.23.2 Update Current Volumes:

The screenshot shows the 'Edit Volume' form within the 'All Volumes' section. The form has two input fields: 'Volume Number *' (pre-filled with '17') and 'Year *' (pre-filled with '2025'). There is also a 'Title (optional)' field. At the bottom of the form are two buttons: 'Update Volume' (in blue) and 'Cancel' (in grey). The list of volumes below the form remains the same as in the previous screenshot. The 'Admin' sidebar and the 'Manage Volumes, Issues & Papers' header are also visible.

Admin can Create New Paper and Issues as well as same process.

2.6 Submit Manuscript:

Allows authors to submit new research articles by uploading manuscripts, supplementary files, abstracts, author details, and required publication information.

The screenshot shows the 'Submit New Manuscript' form in the Author Dashboard. The form includes fields for Manuscript Title, Manuscript Type (set to 'Original Research Article'), Abstract, Keywords, Authors Information (Add Registered Author and Add Additional Authors), Conflict of Interest, Acknowledgments, and Upload Manuscript Files. A 'Submit Manuscript' button is at the bottom right. The footer includes the Technical Journal logo, contact information, and a list of quick links.

2.5 Payment:

Enables authors to manage article processing charges, payment records, invoices, transaction history, and payment confirmations securely.

The screenshot shows the 'Payments' section in the Author Dashboard. It displays a table of payment records with columns for Status, Submission ID, Fee, and Action. Below the table, there is a section for 'Supported Payment Methods' showing various logos for payment providers like VISA, Mastercard, American Express, UnionPay, DBBL NEXUS, bKash, and others. The footer includes the Technical Journal logo, contact information, and a list of quick links.

3.3 Plagiarism Check: (Need Turnitin API for plagiarism check)

The screenshot displays the 'Reviewer Panel Portal' interface. On the left is a sidebar with navigation links: Overview, Assigned Reviews, Plagiarism Check (highlighted in blue), Plagiarism Reports, My Review Logs, Update Profile, and Settings. At the bottom of the sidebar is a 'Logout' button. The main content area is titled 'Plagiarism & AI Detection' with the subtitle 'Upload a manuscript to check for plagiarism and AI-generated content.' Below this is a large dashed box containing an upload icon and the text 'Drag & drop your file here' and 'or click below to browse'. A blue 'Select Manuscript' button is positioned below the dashed box. At the bottom of the main content area is a grey button labeled 'Start Plagiarism & AI Check'.

3.4 Plagiarism Reports: Displays generated plagiarism analysis reports, similarity percentages, and document verification results.

3.5 Review Logs: Maintains a complete history of submitted reviews, reviewer comments, recommendations, and review activities.

3.6 Update Profile:

The screenshot shows the 'Update Profile' page in the Reviewer Panel Portal. The left sidebar contains navigation links: Overview, Assigned Reviews, My Review Logs, Update Profile (highlighted), and Settings. The main content area has a header with a back arrow and the title 'Update Profile'. Below this, there are two main sections: 'Profile Photo' and 'Personal Information'. The 'Profile Photo' section shows a placeholder for a photo and a button to 'Choose New Photo'. The 'Personal Information' section contains several input fields: Title (with a dropdown showing 'Mr.'), Full Name (filled with 'Habibur Rahman'), Email (disabled with a note 'Email cannot be changed'), Mobile Number (filled with '01824200117'), Designation (filled with 'e.g., Researcher, Lecturer'), Department (filled with 'e.g., Computer Science & Engineering'), Address (filled with 'House, Road, Area'), and City (filled with 'Dhaka'). At the bottom left of the sidebar, there is a 'Logout' button.

3.7 Settings:

The screenshot shows the 'Settings' page in the Reviewer Panel Portal. The left sidebar is the same as in the previous screenshot, with 'Settings' highlighted. The main content area has a header with the title 'Settings'. Below this, there are two main sections: 'Dark Mode' and 'Change Password'. The 'Dark Mode' section shows a toggle switch that is currently disabled. The 'Change Password' section has a button to 'Change Password'.

3.7.1 Change Password:

The screenshot shows the 'Change Password' form in the Reviewer Panel Portal. The left sidebar is the same as in the previous screenshots, with 'Settings' highlighted. The main content area has a header with the title 'Settings'. Below this, there are two main sections: 'Dark Mode' and 'Change Password'. The 'Dark Mode' section shows a toggle switch that is currently disabled. The 'Change Password' section has a button to 'Change Password' and a 'Cancel' button. Below these buttons, there are three input fields: 'Current Password *', 'New Password *', and 'Confirm New Password *'. A note 'Minimum 8 characters' is displayed below the 'New Password' field. At the bottom right of the form, there are two buttons: 'Cancel' and 'Change Password'.

New Study Reveals Rising Pollution Levels in Major Rivers

Recent research highlights increasing contamination in key river systems, raising environmental concerns.

A recent study conducted by the River Research Institute has revealed alarming levels of pollution in several major river systems. The research analyzed water samples from multiple locations and found high concentrations of industrial waste, plastic particles, and harmful chemicals.

The findings suggest that rapid urbanization and lack of proper waste management are major contributors to river pollution. Researchers emphasized the urgent need for stricter environmental regulations and community awareness programs.

The study recommends implementing sustainable waste disposal systems and increasing monitoring efforts to protect aquatic ecosystems.

Review Invitation: Importance of Understanding of River and Groundwater Interaction: Perspective of

 **Technical Journal** <redwan.codes@gmail.com>

to me

8:56 AM (6 hours ago) ☆ 😊 ↶ ⋮

Dear Habibur Rahman,

You have been invited to review a manuscript for Technical Journal.

Title: Importance of Understanding of River and Groundwater Interaction: Perspective of

Keywords: Surface water, ground water

Due date: 2026-04-25

Abstract

Surface water-ground water interaction, is the most important part of hydrological cycle. But for a long time, the interaction of the two key portions of the water cycle, groundwater (GW) and surface water (SW), was regarded separate entities and was researched and quantified independently. As the world's concerns over water resources and the environment increase, the importance of considering surface water and groundwater as a single resource has become increasingly evident. Their deep interdependence has been revealed over time. Recent years have seen a paradigm shift in understanding the importance of interactions between groundwater and surface water bodies. The interaction of GW-SW occurs in a variety of ways across all terrain on Earth. Surface water commonly is hydraulically connected to ground water. Interactions between these two regimes are difficult to observe and measure and commonly have been ignored in water management considerations and policies. Many natural processes and human activities affect the interactions of surface water and groundwater.

Accept

Reject

(If a reviewer declines the review invitation, they are required to complete this form.)

The screenshot shows the 'Reject Review Invitation' form on the Technical Journal website. The header includes the journal's logo and navigation links. The form title is 'Reject Review Invitation'. Below the title, a message states: 'Please tell us why you're unable to review this manuscript. Your response will be sent to Technical Journal.' The manuscript details are displayed in a box: 'Manuscript: Importance of Understanding of River and Groundwater Interaction: Perspective of', 'Keywords: Surface water, ground water', and 'Abstract: Surface water-ground water interaction, is the most important part of hydrological cycle. But for a long time, the interaction of the two key portions of the water cycle, groundwater (GW) and surface water (SW), was regarded separate entities and was researched and quantified independently. As the world's concerns over water resources and the environment increase, the importance of considering surface water and groundwater as a single resource has become increasingly evident. 4.16: Final Decision-Making Section:

4.16.1: Update Decision Making Section:

The screenshot shows the 'Make Decisions' section of the Editor Panel. The left sidebar contains a list of navigation items: Overview, Submissions, Initial Screening, Assign Reviewers, Peer Review Reports, Make Decisions (highlighted), Submission Deadline, Guidelines, Reviewer Applications, Reviewer Performance, and Settings. The main content area is titled 'Make Decisions' and features a 'Make Final Decision' section. This section displays the title 'Estimating Suspended Sediment Concentration using Acoustic Doppler Current Profiler (ADCP)' and the status 'Status: Reviews Completed - Ready for Final Decision'. A red 'Cancel Decision' button is visible. Below this, the 'Final Editorial Decision' section includes a dropdown menu for 'Final Decision *' with the option 'Pending (No Decision Yet)' selected. A text area for 'Decision Remarks / Justification *' is provided with the placeholder text 'Explain your decision, next steps for author, any conditions for acceptance...'. At the bottom, there are two buttons: 'Submit Final Decision' (green) and 'Cancel' (grey). A 'Logout' button is located in the bottom left corner of the sidebar.

(Authors will receive mail notification update for changing decision)

4.17: Manuscript Submission Deadline Section:

The screenshot shows the 'Submission Deadline' section of the Editor Panel. The left sidebar is identical to the previous screenshot, with 'Submission Deadline' highlighted. The main content area is titled 'Submission Deadline' and features a 'Manage Manuscript Submission Deadline' section. This section displays the 'Current Active Deadline' with the date and time '22/04/2026 23:59' and the status 'Active'. A red 'Remove Current Deadline' button is visible. Below this, the 'Extend Deadline' section includes a form for 'Deadline Date & Time *' with fields for Day (22), Month (04), Year (2026), and Time (11:59 PM). A note below the form states 'Use format DD/MM/YYYY and HH:mm'. A text area for 'Reason / Note (optional)' is provided with the placeholder text 'e.g., Extended due to high demand / special call for papers'. At the bottom, there is a blue 'Extend Deadline' button.

4.18: Reviewer Applications Section:

4.19: Editor can see Reviewer Applications Details:

4.20: Reviewer Performance Section:

4.21: Settings:

4.22: Change Password: (Editors Can change password; if they want).

The screenshot displays the 'Settings' page within the 'Editor Panel'. On the left, a sidebar lists various navigation options: Overview, Submissions, Initial Screening, Assign Reviewers, Peer Review Reports, Make Decisions, Submission Deadline, Guidelines, Reviewer Applications, Reviewer Performance, and Settings (which is currently selected). The main content area is titled 'Settings' and includes a 'Back to Dashboard' link. Below this, there is a 'Dark Mode' toggle switch, currently disabled. The 'Change Password' section is highlighted, featuring a sub-header 'Update your password to keep your account secure' and a 'Cancel' button. It contains three input fields: 'Current Password *' with placeholder text 'Enter your current password', 'New Password *' with placeholder text 'Enter your new password (minimum 8 characters)' and a note 'Minimum 8 characters', and 'Confirm New Password *' with placeholder text 'Confirm your new password'. At the bottom right of this section are two buttons: 'Cancel' and 'Change Password'.

NB: Domain Provided of <http://www.journal.rribd.org>, and initially 10 GB Space Storage with Backup in VPS Server.

This user manual has provided a comprehensive overview of the system's features, functions, and usage guidelines. By following the instructions and best practices outlined above, users can efficiently navigate the system and perform tasks with confidence and accuracy. Should any issues arise, users are encouraged to refer back to the relevant sections of this manual or seek further assistance from support resources. Continuous use and familiarity with the system will further enhance productivity and overall user experience.
