Dear Sir,

With due respect, we are pleased to inform you that WEB SOFT BD has successfully completed the works of “Procurement of Online Journal Software” under the Contract No: RRI/Journal/2026/010, Date: 18th January, 2026.

The developed system has been completed in accordance with the approved Technical Specification, Terms & Conditions and tender requirements. The software includes all major modules and functionalities such as User Management System, Article Submission Portal, Editorial Workflow Management, Peer Review Management, Publication Workflow, Reporting & Analytics, Digital Archive, API & Integration Layer, Security & Compliance, Mobile Responsive Interface, Administrative Control Panel and other required features as mentioned in the tender specification.

We would also like to mention that the necessary User Training program for the designated officials/users has been successfully conducted. The system has been deployed and made operational successfully.

WEB SOFT BD will provide support, maintenance, updates, and necessary technical assistance as per tender requirements.

Thank you for your continued support.

Your Sincerely

Kazi Fakrul Latif

CEO

Web Soft BD

EXECUTIVE SUMMARY

Introduction

WEB SOFT BD successfully completed the development, deployment, testing, training, and commissioning of the Online Journal Software for the River Research Institute (RRI), Ministry of Water Resources, Bangladesh.

The system has been developed as a modern, scalable, secure, and fully responsive web-based Online Journal Management Platform to automate and digitize the complete journal publication workflow of RRI.

RRI Mission

To publish peer-reviewed scientific and technical research outputs generated from RRI's laboratory studies, field investigations, and numerical modeling activities. • To disseminate knowledge in river engineering, hydraulics, sediment transport, morphology, estuarine and coastal processes, and water resources systems. • To provide a credible platform for researchers, engineers, and professionals to share innovative solutions for water-related challenges in Bangladesh and beyond. • To ensure quality, transparency, and scientific integrity through a structured editorial and peer-review process. • To enhance accessibility and visibility of RRI research through digital publication and online journal management systems. • To support evidence-based decision-making in national water resources planning and development through research dissemination. • To promote academic collaboration and knowledge exchange at national and international levels.

RRI Vision

To establish the River Research Institute Technical Journal as a leading national and internationally recognized platform for high-quality scientific and technical publications in river engineering, hydraulic research, sediment dynamics, and water resources management, supporting sustainable and climate-resilient water development.

RRI History

The River Research Institute Technical Journal is the official scientific publication of the River Research Institute, dedicated to disseminating research findings and technical knowledge in river engineering, hydraulics, sediment dynamics, morphology, coastal processes, and water resources management. The journal was initiated in 1991 as an institutional effort to document and share the scientific outputs of RRI's research activities. Since its inception, it has served as a key platform for publishing peer-reviewed technical papers generated from laboratory investigations, field studies, model experiments, and applied research conducted by RRI scientists and collaborating researchers, as well as research from Bangladesh and abroad working in the relevant field. The journal has been published annually, although occasional irregularities have occurred in some years due to administrative and operational constraints. Despite these interruptions, the publication has maintained its continuity and scientific relevance over time. To date, 17 volumes have been published, with the most recent volume issued in 2025 as a printed hardcopy edition. From the beginning, the journal has been financed through the revenue budget of RRI, reflecting its institutional importance and sustained commitment to research dissemination without reliance on external publication funding.

The journal is also officially registered with an ISSN, ensuring its recognition as a formal serial publication. In line with global trends in scientific publishing and institutional modernization, RRI has recently strengthened its publication system by obtaining an e-ISSN and developing a dedicated online journal management platform. This digital system supports end-to-end manuscript handling, including submission, peer review, editorial processing, and publication. Starting from Volume 18 in 2026, the RRI Technical Journal will transition to a fully online journal format, marking a significant milestone in its evolution. This transformation aims to enhance accessibility, improve publication efficiency, ensure wider dissemination of research outputs, and increase the national and international visibility of RRI's scientific contributions. Through this transition, the journal continues its core mission of advancing scientific knowledge and supporting evidence-based solutions for sustainable river and water resources management in Bangladesh.

**Web Based "TECHNICAL JOURNAL, RIVER RESEARCH INSTITUTE (RRI)"
with Cloud Dedicated Server, Cloud Backup Server & SSL.**

SL No	Item	Module Specification		Section in User Manual	Remarks
		The following modules of Online Journal should be developed using frontend- Next.js , backend- Python , framework- Django Template Engine , database- SQLite/MySQL		Page No-12 in current report.	100% Completed
1	Online Journal	User Management System	• Multi-role registration and authentication (Admin, Editor, Editorial Board, Reviewer, Author, Visitor) • Role-based access control and permissions • User profile management • Password recovery system	• 1.13: Page no-20 • 1.15: Page No-22 • 2.2: Page No-34 • 2.8: Page No-38	100% Completed
		Article Submission Portal	• Online manuscript submission form • Auto Submission acknowledgement • Email submission handling • File upload system (PDF, Word, images) • Standardized formatting templates • Multi-section article structure support • Supplementary materials management	• 2.6: Page no-38 • 2.4: Page No-37	100% Completed
		Editorial Workflow Management	• Preliminary editor review dashboard • Editorial board assignment system • Decision tracking and audit trail • Workflow customization capabilities • Status progression management • Timeline enforcement tools	• 4.1: Page No-44 • 4.12 Page No-53	100% Completed
		Peer Review Management	• Reviewer application portal • Reviewer qualification assessment • Automated invitation system • Review assignment and tracking • Single/double-blind review options • Review timeline management-time will be allocated by Editor	• 7 Page No-07 • 4.18 Page No-59 • 4.1: Page No-44 • 4.12 Page No-53	100% Completed
		Review Process Engine	• Reviewers feedback compilation • Decision aggregation system	• 3.5 Page No-42	100% Completed

			• Qualified/ unqualified determination logic • Review cycle management • Reviewer performance tracking		
		Revision Management System	• Author revision submission portal • Version control and tracking • Revision comparison tools • Multiple revision rounds support • Tracking and history • Author-reviewer communication	• 2.6 Page No-39	100% Completed
		Publication Workflow	• Acceptance letter automation • Type setting workflow integration • Final manuscript verification • DOI assignment and management • Metadata generation (Dublin Core) • Online publication system	• 1.23 Page No-29	100% Completed
		Notification and Communication System	• Automated email notifications • Template-based communications • Status update alerts • Deadline reminders • Rejection/acceptance letter automation	• Note: Reviewer & Author via E-Mail	100% Completed
		Article Status Tracking Dashboard	• Real-time status updates for all stakeholders • Comprehensive tracking from submission to publication • Timeline visualization • Progress indicators • Historical status logs • Author notification system	• 2.3 Page No-35	100% Completed
		Public Portal and Website	• Homepage with latest issues • Advanced search functionality • Article browsing and categorization • Full article display system • Download and view statistics • Archive organization (volumes/issues) • Search Bar for volume and issues • Call for papers (Notice download)	• 3 Page No-04 • 4 Page No-06 • 4 Page No-06 • 1 Page No-03	100% Completed

		Payment Processing Module	- Article Processing Charges (APC) handling - Multiple payment gateway integration (Visa/Mastercard/Bksh/Nagod etc., services available in BD). - Invoice generation - Payment tracking and reconciliation - Financial reporting	1.24 Page No-31	100% Completed
		Reporting and Analytics System	- Submission statistics and trends - Most viewed/downloaded papers - Reviewer performance metrics- (Only for Editor Dashboard) - Geographic readership analysis - Editorial workflow analytics - Custom report generation	3.1 Page No-40 4.20 Page No-60	100% Completed
		Archive and Digital Library	- Volume and issue organization - Long-term preservation (PDF/A format) also in E-book format - Bulk PDF generation - Search and retrieval system - Metadata management - Export capabilities	4 Page No-05	100% Completed
		Integration Management System	- DOI assignment (CrossRef integration) - ORCID author identification - Citation export (EndNote, Zotero/Mandely)- or/this in auto generated text in the bottom of the paper “How to Cite?” - Google Analytics integration - Email service provider APIs - Social media sharing tools	3 Page No-04 3 Page No-04 1.22 Page No-28	100% Completed
		Content Management System	- Editorial content management - News and announcements - About pages and policies - Editorial board profiles - Journal information management - SEO tools	4.1 Page No-44	100% Completed
		Security and Compliance Module	- SSL/HTTPS implementation - Data encryption (at rest and in transit) - User consent management - Data backup and recovery - Security audit logging	On system server and backup VPS server.	100% Completed

		Mobile Responsive Interface	• Cross-platform compatibility • Mobile-optimized user interface • Responsive design elements	• Page No-13 in current report. Also visit https://journal.rribd.org/ in Mobile.	100% Completed
		Administrative Control Panel	• System configuration management • User role administration • Workflow customization • Template management • System monitoring and maintenance • Backup and restore functions	• 1.1 Page No-11 • 1.13-1.15 Page No-21 • System Workflow Page No-02	100% Completed
		API and Integration Layer	• RESTful API development • Third-party service integrations • Data export/import capabilities • Webhook support • Custom integration endpoints • API documentation and testing tools	• Able to Any third-party API like Turnitin and any payment API's.	100% Completed
		Testing and Validation	• Testing and validation of software by Bangladesh Computer Council (BCC) or Bangladesh Govt. certified any organization	• Software System Testing By BCC.	WEB SOFT BD has successfully completed internal testing of the system. Currently, the software testing and validation process is ongoing by Authority from BCC.
		User Training	Three (03) days training of Control Panel Administrators (15 persons)	• Provided 3 days training session.	100% Completed
Special Note– i) Any other required upgradations/changes in the modules or features in 12 months after commissioning the software should be accomplished by the bidder. ii) Source Code including frontend and backend should be provided by the bidder to Purchaser.					100% Completed
